# MOHAMED ARSATH M

Chennai, India • +91 7845117336 • arsath.techdata@gmail.com • **Portfolio:** arsathmpt.github.io/portfolio •
**LinkedIn:** linkedin.com/in/mohamed-arsath-0462a9354

## SUMMARY

Data Science undergraduate with hands-on experience building machine learning and computer vision models, including classification systems achieving 88–98% accuracy. Skilled in Python, SQL, and end-to-end ML workflows, with a track record of turning raw data into deployable tools and business-ready dashboards.

## EDUCATION

**Bachelor of Computer Applications (Data Science)** Aug 2023 – May 2026
Vels University, Chennai, India CGPA: 7.58 / 10.0

## SKILLS

| | |
|---|---|
| **Languages** | Python, SQL, R |
| **Libraries** | Pandas, NumPy, Scikit-Learn, PyTorch, Matplotlib, OpenCV |
| **Concepts** | Machine Learning, Deep Learning, Computer Vision, Feature Engineering, NLP |
| **Tools** | Excel, Git, Jupyter Notebook, VS Code, Power BI, Tableau |

## INTERNSHIP EXPERIENCE

**Data Science Intern, NullClass** Aug 2025 – Oct 2025
*View Certificate*

Built a voice-based age detection classifier achieving 88% accuracy, processing 50+ hours of audio data through feature extraction and model tuning.

Developed a senior citizen identification model reaching 92% precision, supporting downstream classification workflows.

Improved a car color detection model's robustness to lighting variation by 15% through targeted data augmentation techniques.

## PROJECTS

**ResumeIQ: AI-Powered ATS Parser** Live App • GitHub
Engineered an NLP-powered ATS resume parser using Python and Flask, implementing a semantic matching algorithm to convert unstructured resumes into structured, actionable insights for automated evaluation.

**Data Jobs Dashboard** GitHub
Designed an interactive Power BI dashboard transforming 400,000+ raw job postings into visual insights on global salary trends, top hiring platforms, and in-demand skill requirements.

**Automated Car Colour Detection** GitHub
Built an automated vehicle color detection algorithm using OpenCV color histograms, achieving 98% accuracy across 1,000+ images under varying lighting conditions.

## CERTIFICATES

Machine Learning with Python (IBM) – Regression, classification, and clustering algorithms applied across 3+ capstone projects.

SQL for Data Science (UC Davis) – Complex queries, joins, sub-queries, and data manipulation for analysis.

Foundations: Data, Data, Everywhere (Google) – Data analyst fundamentals, the data lifecycle, and data-informed business decisions.
